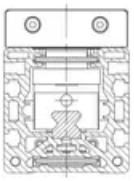
Linear Unit MTJ 40

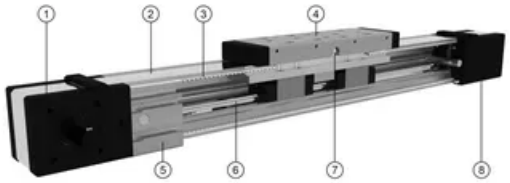
The MTJ linear units have toothed belt drive and compact dimensions to provide high performance features such as high speed and good accuracy. The unit MTJ have a pre-tensioned steel reinforced AT polyurethane timing toothed belt.
In conjunction with a zero-backlash drive pulley high moments with alternating loads with good positioning accuracy, low wear and low noise can be realized.



All parts in the profile are protected from dust and other contaminations. As corrosion-resistant protection strip is available as option.

Dimensions in mm.

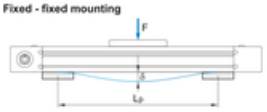
Modulus of Elasticity: E = 70000 N / mm2
Operating Temperature (°C): 0 ~ +60 For operating temperature out of the presented range, please contact Rollco.
Duty Cycle: 100%
Max. Acceleration (m/s²): 50 (Optional, acceleration up to 70 m/s² possible if used without INOX seal strip)
Max. Travel Speed (m/s): 1.5 (Optional, travel speed up to 6 m/s possible if used without INOX seal strip)



1. Drive block with pulley
2. Corrosion-resistant protection strip (available also without protection strip)
3. AT polyurethane toothed belt with steel tension cords
4. Carriage with built in magnets
5. Aluminium profile-hard anodized
6. Linear ball guideway
7. Central lubrication port, both sides
8. Tension end with integrated belt tensioning system

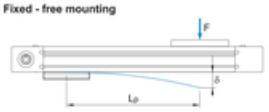
Deflection of the linear unit

Fixed - fixed mounting



δ Maximum deflection of the linear unit [mm]
δmax Maximum permissible deflection of the linear unit [mm]
F Applied force [N]
Lp Unsupported profile length [mm]

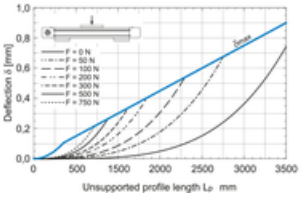
Fixed - free mounting

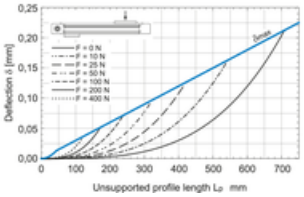


The maximum permissible deflection δmax must not be exceeded. In the case that maximum deflection δ exceeds the maximum permissible deflection δmax additional profile supports are needed.

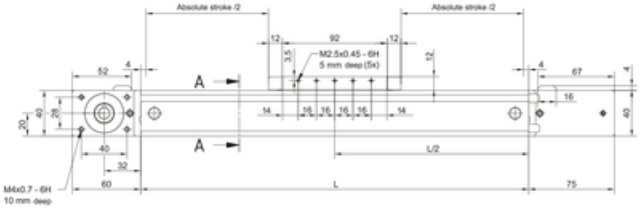
Deflection of the linear unit

MTJ 40

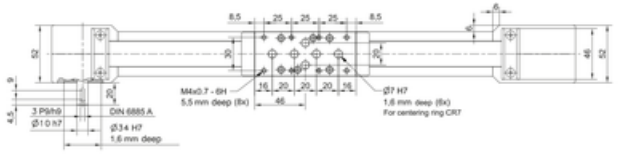




① *The linear units do not include any safetey stroke.*
Absolut stroke = Effective stroke + 2 x safety stroke.



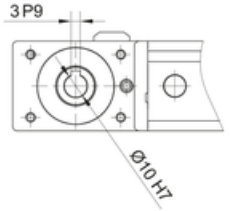
① *Lifetime lubricated.*

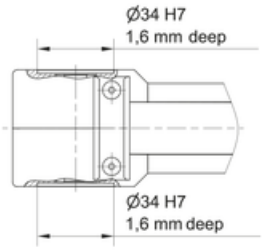


① *Journal with or without keyway.*

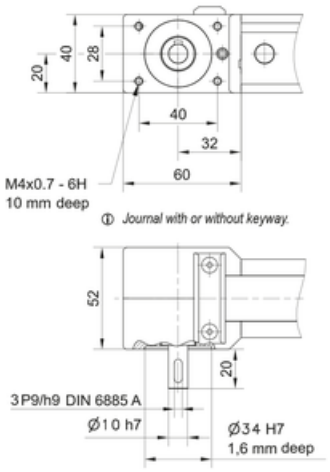
① *All dimensions in mm. Drawings scales are not equal.*

TYPE 0

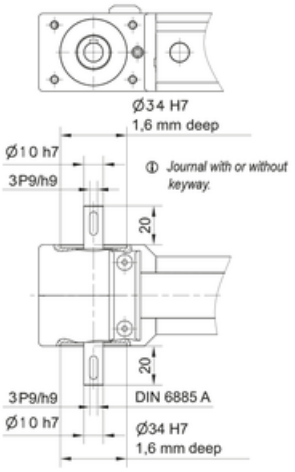




TYPE 1 L and 1 R

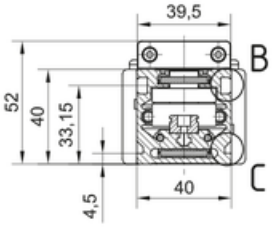


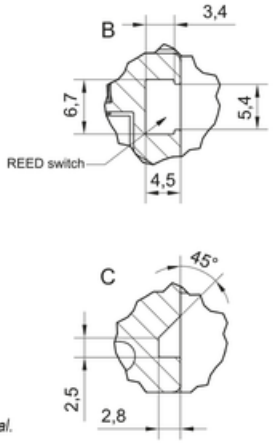
TYPE 2



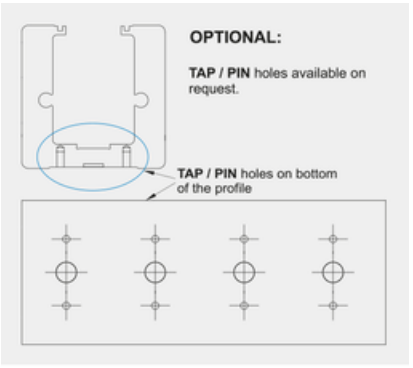
MTJ 40

A-A





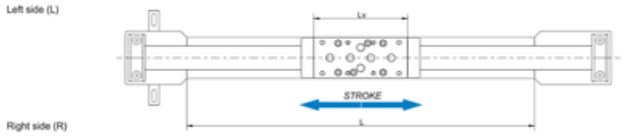
① *All dimensions in mm. Drawings scales are not equal.*



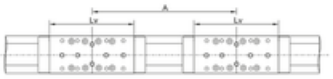
Defining of the linear unit length

L = Effective stroke + 2 × Safety stroke + Lv + 32 mm **Lv = 92 mm**

Ltotal = L + 135 mm



Double-Carriage

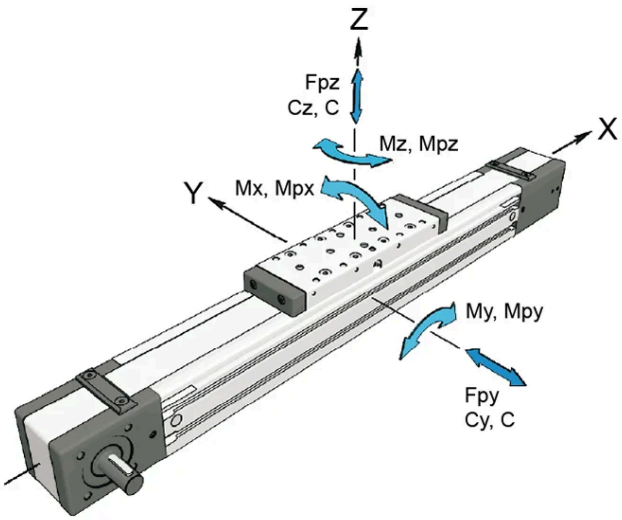


L = Effective stroke + 2 × Safety stroke + Lv + A + 32 mm

Ltotal = L + 135 mm

A ≥ Lv + 24 mm

General data



For lengths/stroke over the stated value in the table, please contact Rollco. Values for max. stroke are not valid for double carriage (equation of defining the linear unit length for particular size of the linear unit needs to be used).

For minimum stroke below the stated value In the table, please contact Rollco.

Recommended values of loads

All the data of static and dynamic moments and load capacities stated in the table are theoretical without considering any safety factor. The safety factor depends on the application and its requested safety. We recommend a minimum safety factor (fs =5.0).

Modulus of elasticity
E = 70000 N / mm^2

Designation	Carriage Length Lv (mm)	Dynamic Moment Mx (Nm)	Dynamic Moment My (Nm)	Dynamic Moment Mz (Nm)	Dynamic Load Capacity C (N)

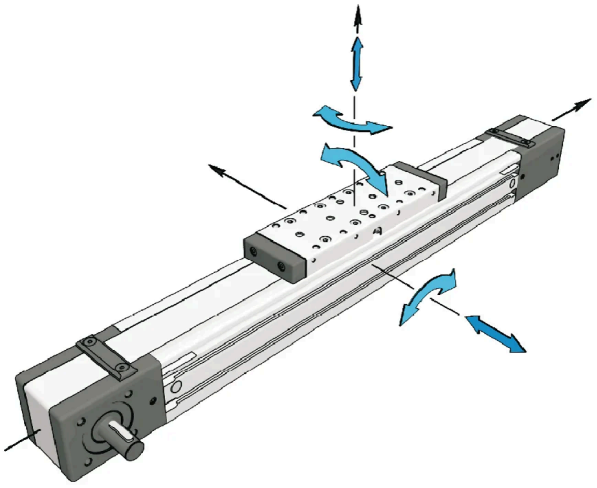
General data double carriage



A - Distance between carriages.

Max. travel speed and max. acceleration of linear unit with the corrosion-resistant protection strip is 1,5 m/s and 50 m/s^2 respectively.

The stated values are for strokes up to 500 mm. No load torque value increases with stroke elongation.

Max. acceleration (m/s^2): 70

For acceleration over the stated value, please contact Rollco.

Designation	Carriage version	Dynamic Load Capacity C (N)	Static Load Capacity C0 (N)	Dynamic Moment Mx (Nm)	Dynamic Moment My (Nm)
MTJ 40	2	9220	13860	57	4.6 × A (mm)
