Magnetic Door Stop

The magnetic stop mounts on the door slot and makes up a stop and an abutting wedge. After swinging in the door against the stop angle, the magnetic latch will hold it in place.

If profiles with closed slots are used, remember that you must remove the cover to install the slot nut and the anti-twist device.

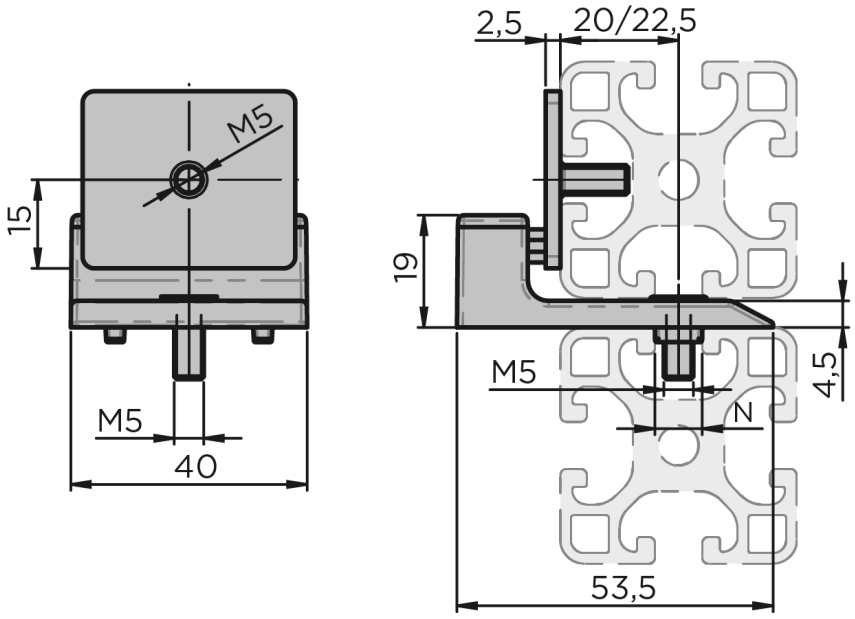

Magnetic door stop with retaining plate and M5 × 14 countersunk screw

Material: Black plastic (PA6)
System: 40 - Slot 8
Type: Door Latches & Interlocks
